March 26, 2020

Effective March 27, 2020 - STOPNGO Line to begin fulfilling essential healthcare products.

We are excited to announce that STOPNGO Line has been authorized as an essential business per CISA guidelines for the production of Public Health products including our 100% Made in USA Hand Sanitizers and Personal Protective Equipment.

Orders are now being accepted, production has begun, and first orders will begin shipping on April 6, 2020. Staff on site will continue to follow CDC guidelines for increased disinfection of workstations and common areas while practicing social distancing standards.

Our Customer Service team is now fully equipped with work-from-home access, but response times are longer than normal given the circumstances. Email communication is likely the best method and would provide a more timely reply.

- Our revised business hours for Customer Service are M-F 8:00AM to 4:00PM.
- We will continue to accept all orders, answer inquiries, provide virtuals and quotation info.
- We are able to perform all normal functions to service our customers other than production related.
- We will resume production of all non-essential products on April 20, 2020 or deemed safe to do so by local officials.
- Blank orders are able to be fulfilled and shipped.

We will continue to support local front line health care professionals with donating available PPE supplies.
